

Pacman Coffee Table

by Claudia Moreira Salles, 2012

Reference: #00001578

Combining two of Claudia Moreira Salles' recent signature materials - concrete and wood - the Pacman coffee table's amorphous shape is comprised of a solid block in two parts: wooden base and concrete top. The recess in the tabletop came as a way of disguising the veneer joint, ultimately giving its distinct feature, revealing Salles' technical expertise as to how it informs the aesthetic of her work.
