

Grampo Coffee Table

by Fernando Mendes, 2013

Style + Creativity = Grampo Coffee Table, a unique piece created in 2013 by Fernando Mendes.

It is part of a collection of furniture inspired by woodworking tools. Crafted from muiracatiara wood in a meticulous woodworking process, clamps, or “sargentos” in Portuguese, are clipped onto a glass top and used as the table’s legs.

The added convenience of this table design is that it can be easily re-assembled and transported.

For round or triangular tabletops, three clamps are used, and for square or rectangular tops, four clamps are used.
