

Voador Bowl

by Carlos Motta, 2019

The 'Voador' plate and bowl ensemble are handmade by Riberinhos whose home is the Amazon, in resistant Muiracatiara wood, certified by the FSC. Designed for daily, versatile use, as sets or individual pieces, they gracefully stack creating the illusion of flotation, and realize the piece's name, which translates to 'flyer.' These pieces are part of the Attom collection by Carlos Motta and his son, Diego Motta: utilitarian designs for the everyday created with sustainable materials and with responsible production choices.

- Made in Muiracatiara wood, certified by the FSC
- Part of the Attom collection
- Available in different sizes
