

Ondine Lounge Chair

by Jorge Zalszupin, 1980

The 'Ondine' Lounge Chair is constructed of a curved metal structure, encased in molded foam, and covered in a specialized flexible fabric. The design principles found in this 1980s piece, as well as its material components define the Ondine's strong and distinguishable appearance. This was a prototype made by the designer for his beach house and was never mass produced until recently.

- Metal structure
- Molded foam and flexible fabric
- Reissued by Etel
- Made to order
