

Ayahuasca Sideboard

by Arthur Casas, 2022

Ayahuasca is a medicinal plant, native to the Amazon, which is used in traditional ceremonies for divination, mystification, and other shamanic rituals. The sideboard bearing its name is made of solid Brazilian hardwood, and has an element of asymmetry and a cantilevered side. Two lateral legs support a strong chest of cabinets and drawers, giving it a somewhat majestic stance.

Part of the Tapajós collection, launched in partnership with Espasso in December 2022.
